SALT FOR THE THEOAT .- In these days, when diseases of the throat are so universally prevalent and in so many cases atal, we feel it our duty to say a word in behalf of a most effectual, if not positive, cure for sore throat. For many years past. ndeed we may say during the whole of a life of more than forty years, we have been subject to a dry, hacking cough, which is not only distressing to ourselves, but to our friends and those with whom we are brought in business contact. Last fall we ing has just been received by Major-General | were induced to try what virtue there was ommon salt. We commenced by using three times a day-morning, noon and ight. We dissolved a large tablespoonful of pure table salt in about half a small numblerful of water. With this we gargled the throat thoroughly just before meal time. The result was that during the entire winter we were not only free from oughs and colds, but the dry hacking cough had entirely disappeared. We attribute these satisfactory results solely to the use of salt gargle, and most cordially recom-mended a trial of it to those who are subect to disease of the throat. Many perons who have not tried the salt gargle have the impression that it is unpleasant, out after a few days' use no person who loves a rice, clean mouth and a first-rate

[SPECIAL DISPATCHES TO THE RECORD-UNION.]

General Schofield's Views Relative to the Indian Troubles. Washington, June 4th .- The following ispatch from General Schofield to Adjutant-General Drum, relative to the Indian troubles, has been received at the War Department:

In reply to your dispatch of this date, please form the Secretary of War that I do not be-eve it practicable to do anything more at this me than has been done to give protection to tttlers in Arizona and New Mexico from masettlers in Arizona and New Mexico from marauding Indians. It is not possible to actually guard all the frontier settlements. That would require a force many times larger than the United States army; besides, the damage has already been done in Arizona and New Mexico. The settlers who have escaped have taken refuge at the military posts and large settlements. I understand that General Crook and Colonel Bradley have all the treosy they are use in purpose. Bradley have all the troops they can use in p Bradiey have all the troops they can use in pur-suit of the Indians, but will send more if they can use them. In my opinion the only way to protect scattered settlers from marauding In-dians is to keep the savage Indians under mili-tary control, and not permit them to roam at will over the reservation.

Admiral Jouett's Report on the Colom-

bian Situation.

Washington, June 4th.—Admiral Jouett has made an official report to the Navy Department of his recent trip to Carthagena for the purpose of taking a number of Commissioners, in order to make, if posible a peaceful settlement with the revo utionists. He arrived there May 13th, after attitude toward the Government of the the insurgents had attacked Carthagena and had been repulsed. Admiral Jouett found that the whole insurgent force before Carthagena, numbering 1,500 men, had embarked on board their steamers, and were ready to retreat to Barranquilla. He immediately sent an officer leaders of the insurgent forces, Generals Gailan and Hernandez, and informed them that they could not leave the harbor with their steamers without his consent, and that if they attempted to do so he would prevent their departure by force. He also informed them that he de sired to see them on board the flagshir Tennessee as soon as possible. Generals Gaitan and Hernandez both came on poard his vessel the same evening, and the Admiral had a long interview with them. From their statements and also from the testimony of outside partes, he was convinced that although there may have been some irregularity originally in getting possession of the vessels, they were only consequent to the state of war which existed at Barranquilla. They were used by agreement, and the insurgents were giving compensation for their use

risable to take forcible possession of the steamers, or to detain them longer during he important military manœuvers of the nsurgents, even if they were seized without compensation. The Admiral urged Generals Gaitan and Hernandez to make efforts toward a peaceful settlement of the difficulties between the two ostile parties, and they both consented o do so. Fourth of July.

The committee of fifty citizens appointed by the City Trustees on Tuesday to arrange for a proper celebration of the Fourth of July met in Department Two of the Supe rior Court last evening. The meeting was called to order by Mayor Brown, who stated its object. J. O. Coleman was elected Chairman and O. P. Dodge Secretary. Mayor Brown said that the Trustees were willing to assist all in their power. which would be to appropriate \$1,000. He thought the citizens should raise \$1,000 more, and with that amount a celebration could be got up that would be a credit to

The Chairman then called upon a number of citizens to give their views as to the best way of celebrating the Nation's anniversary.
M. S. Sternfels, C. V. Kellogg and James

The town had been canvassed by soliciting committees lately from one end to the other. A large num ber of citizens were out of employment and many were scarcely able to obtain the

common necessaries of life. Throw the flags to the breeze, have an oration, poer etc., and if the military desire to parade, le them do so. It is folly to waste money on fireworks. They are always a failure. P. E. Platt said he thought a proper ob-servance of the national holiday was the luxury if the people had to pay for it. He Fassett against it.
was perfectly willing that the Trustees A communicat should foot the entire bill. He did not be-lieve in a poor celebration; either make a ling that a committee be appointed by th good one or have none at all. C. W. Reed recently sent to Professor Hilgard, at the State University, a sample from his well near the old Beet Sugar factory, and has received the following report

The soluble portion, forming only three-fourths of a grain out of the twelve, consists esfourths of a grain out of the twelve, consists essentially of common-salt with a little carbonate of soda. The insoluble part consists of about equal proportions of the carbonates of lime and magnesia, with a little silica. These precipitate on boiling, leaving a water remarkably free from mineral ingredients. The volatile part consists chiefly of water with a little organic matter, not enough to brown the residue materially when it is heated. Evidently there is no influx of sewage or other drainage, which would be at once indicated by a large proportion of common salt. The salts present are derived from the alkali noted on the surface, of which the carbonate of soda dissolves a certain amount of vegetable matter in passing through the ground. The water is, therefore, a good, potable one, a little hard, but otherwise unexceptionable. Respectfully

Valensin vs. Valensin. The Valensin divorce case was resumed

n Department Two of the Superior Court at 10 A. M. yesterday. The defendant took the stand, and his direct testimony was resumed. He said in March, 1883, he received a draft from Europe for \$866, which he deposited with the People's Savings Bank. I paid interest on the Hall place amounting to \$2,000, and on Mrs. Valensin's place \$4,360. After Buccaneer died I determined to go out of the horse bridge in the large bridge. of the horse business, and for that purpose advertised them for sale at Oakland. Owing to bad weather, there were several postponements, and, having lost so many valuable horses, a report got out among orsemen that my stock had the glanders. This had the effect of keeping people away, and the prices realized were not what they should have been. I arranged with the auctioneer that I should give him a sign when to let an animal go, and when to bid it in. We sold \$5,340 worth, which netted \$4,594 05. Mrs. Valensin took about \$300 to pay some small bills. I paid some bills, and deposited \$3,100 of it in the Sacramento

I told her I hought, under the circumstances, she should go with me. I came to America at her request and the earnest solicitation of ner parents and I thought in this matter she was not acting right. The first person that I ever listened to who told me of my wife's infidelity was Chris. Lang at the State Fair. Before that I would not listen to those who wished to tell me, for I was not willing to believe that such things could be true. His statement was of such a character that my faith in Judge Mesick and Mrs. Valensin was shaken. The next one who told m what had occurred between those two parties was Miss Blanche Huber. She strongly onvinced me that what she said was true nd after she made the same statement to Grove L. Johnson in the presence of wit nesses there was no longer room to doubt

COME!

The Calendar proves it. So does the Stir and Activity of our Warm Weather Trade. The Vim. Energy-Force, exhibited in the movement of Summer Goods here, are Unmistakable. They mean that we are Completely Equipped with Everything Desirable, and that People WANT what we have. It is not a Feast at which there are no Guests.

Such Steady and Unswerving Trade from morning till night. week in and week out, is one of the Strongest Possible Arguments in favor of our Stores. For there is nothing to bind People here, except the Dictates of their own Judgment. There is no Reason why so many Hundreds of Customers come to us daily to be served, except that there is Sound Logic in their so doing.

The Strongest Convictions are those based on Experience. People KNOW our Qualities are Right. People KNOW our Styles are Fresh. People KNOW our Prices are Right. And so, as Experience Teaches, Trade Compounds and Multiplies!

THE "HOME SEEKER."

TIVE THOUSAND COPIES OF THE "HOME SEEKER" were published last month and placed in the hands of those coming into the State in search of homes Our agent at Ogden goes into the cars and places a copy in the hands of each head of a family and single person. The "HOME SEEKER" is the best advertising medium ever offered to those who wish to extend their business to new settlers. To hotel men and real estate agents it is invaluable. An advertisement in an ordinary publication, promiscuously distributed, does not meet with more than one customer out of every hundred people which it reaches. The "HOME SEEKER" is distributed only to those who are coming here with a desire of buying immediately. Not a single copy is wasted. We have received a solid support from the business community of the northern half of the State. The continuous publication of the "HOME SEEKER", is an assured fact. More land can be sold by an advertisement with us than any other way known. We shall make the "HOME SEEKER" subserve the best interests of the northern half of the State. It is issued to promote immigration and to locate the settlers in the northern counties. We sak the support of the business reation and to locate the settlers in the norther counties. We ask the support of the business men of that region which we are laboring to build up. Our work is important to every branch of business. If you want to help your selves, help us.
